can we do some face time next Wednesday? That would be great! Our office or yours?

Thank you,

I can do a call today, or we can meet in person next week.

Friday the 10th is shot, but we might be able to find time Wed or Thurs.

incredible information thank you, do you have time tomorrow or or next week, wed-fri?

Thank you this is very helpful as we are looking to quote out getting the trolleys done.

Thank you!

We use a technology called "Blue Tooth Low Energy" (BLE) beacons -- These are sometimes called iBeacons (from apple) or "Eddystone" from Google.

There are a variety of products around that can read the beacons and trigger events.

I do not know of any off-the-shelf products that will do what you are after, but rolling your own product with existing parts should not be too difficult.

We can get together for a call or brief meeting at your convenience.

Thanks,
David

Excellent, thank you David and Jonathan. Let's maybe set up a few minutes to discuss the technologies you have used for Bluetooth Nodes around the Iowa with prerecorded messages playing.

Thanks!

Jonathan,

Hope you are well. We are working on adding prerecorded messages to the trolley, I believe in the past you mentioned you have a similar system for your Iowa tour app or you were working on something like that.

Was curious if I could pick your brain about implementing on trolleys, or if you had any advise or contacts I could speak with about blue tooth nodes etc.

Thank you,
